

1 SCROLL COLLAR FOR RECIPROCATING SAW

2 ABSTRACT

3 A scroll collar and reciprocating tool assembly for providing a rotating grip
4 on the tool wherein the reciprocating tool has a motor housing, a working end and a gear
5 housing. A support structure is disposed on the gear housing and a scroll collar rotates
6 around the support structure. The scroll collar rotates around a scroll collar axis and
7 allows the user to rotate the tool with one hand without having to readjust or release the
8 grip on the tool with the other hand.
